ETHANOL BREATH STANDARD ANALYTICAL REPORT

Ethanol Breath Standard Lot Number 17618080A1 Expiration Date 08-05-2020

This standard was analyzed by ILMO Specialty Gases with a reported result of 208 ppm which is the equivalent of 0.080 AC of Ethanol in Nitrogen. ILMO Specialty Gases has provided a Certificate of Analysis traceable to N.I.S.T. SRM Ethanol Standards.

A proper result for the standard test using a cylinder of this lot number would be the range of 0.075 to 0.085 g ethanol/210 L of vapor (g/100 ml of blood or g/210 L of end expiratory breath).

The Intoxilyzer® will print out the value of the standard test in 3 digits on Intoxilyzer® Test Record (Form 106-I8000).

The number of cylinders sent to each location will be based on need. The standard may be used until the date of expiration as indicated by the manufacturer's Certificate of Analysis.

1 The stated expanded uncertainty was determined from the combined uncertainty associated with the following:
calibration standard, equipment accuracy, repeatability and random variability (instrument readability).
The uncertainty is expressed as \( U = k \sigma_u \), where \( u \) is the combined standard uncertainty and
the coverage factor \( k \) is equal to 2, yielding a level of confidence of approximately 95%.

1 The results on this report relate only to the items tested in the group of cylinders designated by the 'Lot Number' field.
