OFFICE OF ATTORNEY GENERAL**

**Criminal Justice Statistics Special Report**

**Homicide in North Dakota, 2024**

**Attorney General  
Drew H. Wrigley**

Report prepared by  
Jeff Vyska  
Bureau of Criminal Investigation

2025

The term "homicide," for purposes of this report, includes the Uniform Crime Reporting (UCR) offenses of murder and non-negligent manslaughter. Homicide refers to the "willful killing of one human being by another." It does not include attempts to kill, assaults to kill, suicides, accidental deaths, justifiable homicides or deaths caused by gross negligence.

## **HOMICIDE IN 2024**

- In 2024, Nineteen homicide deaths were known to the Uniform Crime Reporting (UCR) program. Based on a state population estimate of 796,568, the resulting homicide rate for the state of North Dakota was 2.4 per 100,000 population. See Table 2 on page 4 for information regarding rates for previous years.
- **Victim Gender:** Fifteen of the homicide victims were male
- **Victim Age:** Nineteen of the victims were adults. "Adult" is defined as a person aged 18 or older. See Table 1 on page 2 for a summary of homicide incidents in 2024.
- **Weapons:** Firearms were involved in the deaths of 7 homicide victims.
- **Domestic Violence:** There were three homicides in 2024 resulting from domestic violence incidents. See definition on page 11.
- **Assailant Gender:** Nineteen of the twenty identified assailants were male.
- **Assailant Age:** 19 identified assailants were adults. 1 was juvenile.
- While tribal law enforcement agencies and any other federal law enforcement entities in the state do not participate in the state UCR program, every effort is made to include all homicide incidents occurring within the state's borders.

## **CLEARANCE RATES**

- Cases may be "cleared by arrest" of an assailant, or "cleared exceptionally," if a physical arrest cannot be made for reasons beyond the control of law enforcement. An example of an exceptional clearance would be a case in which the assailant committed suicide after killing someone.
- "Clearances" should not be interpreted as "convictions." The information regarding clearances, collected through the National Incident-Based Reporting System (NIBRS) program, reflects law enforcement activity. If an arrest is made, the NIBRS program considers the case cleared. NIBRS data does not reflect the results of prosecution of assailants.
- The average clearance rate for homicides in North Dakota during the period from 2005 to 2024 is 93 percent.
